

# SPECTRUM METAL

## TECHNICAL DATA

- Dimension: 2800 x 1270 mm
- Thickness: 18 mm
- Base: MDF

Spectrum Metal is a product offering in the most desired metallic shades - Copper, Gold, and Titanium. The laminate that is applied to the board is additionally enriched with a layer of metal.

The collection also offers two types of surface finishes - Smooth and Crumble ("hammered").

## TECHNICAL INFORMATION

The board is more resistant and cheaper than its natural counterpart, and an additional advantage is that it is easy to process.

Metallic products are very popular and appear more and more often in interior designs, giving the furniture elegance and a sublime glamorous style. The metal surface, with an interesting optical effect, will give even classic furniture an urban chic look.
